

## Cancer Care – Dansk Sundheds sikring makes a difference

Cancer Care is designed for companies that want to act quickly and provide reassurance to employees when cancer strikes.

The program creates calm and clarity through a single, coordinated plan and a dedicated care coordinator – working closely with the public healthcare system and the employee's treating physicians.

It is a solution that supports the employee during a critical life situation and clearly reflects the company's responsibility and care.

### With Cancer Care, you get:

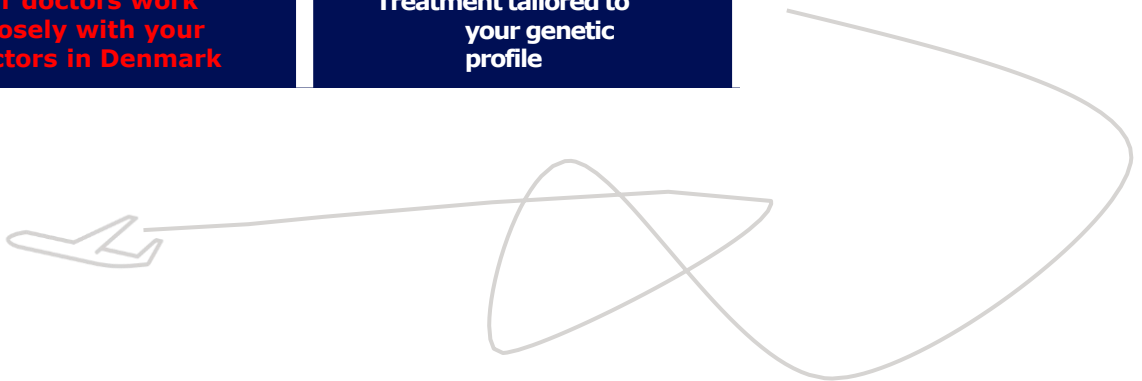

**We analyze the cancer cells and tailor the treatment to target them precisely**

**A personal healthcare coordinator to guide and advise you throughout the entire process**

**Our doctors continuously evaluate and adjust the treatment**

**Our doctors work closely with your doctors in Denmark**

**Treatment tailored to your genetic profile**

## Feedback from current customers

*"The overall quality of the support exceeded my expectations."*

*"It helped me better understand my situation and treatment."*

*"It added significant value to my treatment journey."*

*"It gave me reassurance that the doctors agreed on my treatment plan."*

*"With Dansk Sundhedssikrings partner, Further, I experienced a professional and attentive team throughout the entire process."*

*"It provides me with a sense of calm and security when several doctors evaluate my diagnosis and treatment plan."*
